

Ken Braiman, CDT: *Improving Communication for Predictable Outcomes; Full Arch Workflow & Technological Advancements*

About the speaker: Mr. Braiman founded his first full-service laboratory, Progressive Dental Reconstruction in 1976 and earned his C.D.T shortly thereafter in 1980. He has always been driven by advancements in dentistry and was introduced to implant prosthesis training by P.I. Branemark and Axel Kirsch (IMZ) when they launched dental implants in the US in 1984. Through the course of his career, Mr. Braiman formally trained in Nobelpharma Implants at Northwestern University, as well as other major implant companies. He became a Master Technician of Dental Ceramics in 1987 with Degussa and specialized in all-glass esthetic and implant restorations. In addition to being a recognized speaker for some of the major implant companies, Mr. Braiman is certified with Cendres Metaux in Precision milling and became a LVI Certified Master Technician in 2005. In 2016, Mr. Braiman founded Dynamic Dental Solutions, a new digitally oriented laboratory to further his quest in dental technology and create a more holistic approach to treatment planning, involving most disciplines. Mr. Braiman's forte lies in treatment planning and problem solving of complicated and compromised implant placements. He focuses on streamlined protocols to improve quality and reduce chair time.

Dr. Tom Brown, Endodontics: *There's More to Endodontics Than Just Root Canals*

There is no doubt that the bulk of endodontic procedures performed is made up of primary nonsurgical endodontic treatment. This presentation explores the more commonly encountered situations that may not even require a root canal. Insights into diagnosis and management of these situations as well as the evidence-based rationale behind those decisions will be shared.

About the speaker: Dr. Brown received his DMD degree from the University of Florida College of Dentistry. After practicing as a general dentist for two years, he attended the University of North Carolina - Chapel Hill where he earned his Masters of Science in addition to his certificate in Endodontics. He maintains a private practice in Orange Park and is actively involved in the Florida Dental Association, currently serving on the Board of Trustees.

Dr. Vaughn Holland, Orthodontics: *Orthodontics in a Nutshell*

When to refer children, what can be done with impactions, benefits of skeletal anchorage, and orthodontic pearls to make life easier.

About the speaker: Dr. Holland is a fourth-generation dentist who grew up in Jacksonville. He received his dental degree from the University of Florida College of Dentistry, graduating Magna Cum Laude. Following dental school, he became the first dual-specialty resident at the University of Florida, completing a customized dual specialty program in both Prosthodontics and Orthodontics. Dr. Holland has chosen to focus his practice on Orthodontics. However, his extensive training makes him uniquely qualified for more complicated orthodontic cases, particularly interdisciplinary cases. He has an orthodontic practice in the Ortega area of Jacksonville, where his patients are approximately 40% adults.

Dr. Josh Perry, Prosthodontics: *Congenitally Missing Lateral Incisors - Implant and Restorative Solutions*

Treatment planning patients with congenitally missing lateral incisors comes with it many developmental, surgical and restorative challenges. Treatment options generally fall into two categories: orthodontic assisted canine substitution or prosthetic replacement. The primary objective is conservation, with the treatment of choice being the least invasive option that satisfies the expected esthetic and functional objectives.

About the speaker: Dr. Josh Perry received his DMD from the University of Florida in 2012, where he then completed his Masters and Certificate in Prosthodontics. He is a board certified Diplomate of the American Board of Prosthodontics and a fellow of the American College of Prosthodontist. He maintains a private practice in Ponte Vedra Beach limited to implant prosthodontics and restorative dentistry.

Dr. John Thousand, Periodontology: *Bone Augmentation, Soft Tissue Augmentation*

This presentation will discuss current state of hard and soft tissue augmentation for implant site development and successful long term outcomes.

About the speaker: Dr. John Thousand is a passionate clinician who owns and operates a set of periodontal specialty clinics in Northern Florida. As a practicing periodontist, he has had extensive training and experience in the field of implant dentistry. Dr. Thousand is a diplomate of the American Board of Periodontology and completed both a residency in Periodontology and a fellowship in Implantology. Dr. Thousand strives to improve the quality of modern implant dentistry through the education of his patients and his referring dentists.
